

LEED Certification

This is to certify that the aluminum extrusion produced in the alloys 6063, 6061, 6005 meets the requirement specified by the LEED program as applicable to MR Credit 4.1: Recycled Content, and complies with ISO 14021-'Environmental Labels and Declarations', where the recycled aluminum content is greater than 50%.

The aluminum billets used on our product consists of the following approximate percentage of content: 60% scrap aluminum, consisting of 48% post industrial press scrap and 12% post Consumer.

As this product consists of greater than 50% recycled content, our billet may be considered applicable to MR Credits 5.1 and 5.2, as being 'recovered' within 500 miles of the job site. Our purchased scrap, which makes up the majority of our billet, is sourced from scrap dealers within the Midwest United States.
