

Instructions

Contents

1. Aluminum End Caps
2. Self-Tapping Screws

SlatWall MX® End Cap Kit
P/N: HSL.EC

Installation Instructions

1. The End Cap(s) can be installed in either of 2 ways: with adhesive or with screws.
2. To install using adhesive: apply liquid adhesive to the back side of the End Cap and press it to the SlatWall. Repeat for each End Cap.
3. To install using screws: use a power drill, install self-tapping screw through the End Cap and into the SlatWall.
 - > to start self-tapping screw, apply pressure to power drill
 - > once self-tapping screw starts threading itself, use light pressure and do not over tighten which will cause the threads to strip
 - > for best results, use a ruler and mark the position of where each screw will go for a consistent appearance
 - > if having trouble with self-tapping screw walking, use a center punch and indent the End Cap first before installing self-tapping screw
 - > Repeat for each End Cap
