

## How many fasteners do I need for my PegBoard?

The quantity of fasteners needed depends on 2 things:

1. The size of the PegBoard to be mounted:

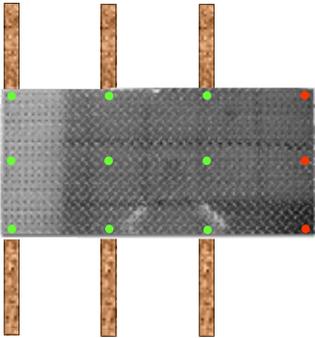

- 2x2 unit requires minimum 9 total mounting points
- 2x3 unit requires minimum 9 total mounting points
- 2x4 unit requires minimum 12 total mounting points
- 2x6 unit requires minimum 18 total mounting points
- 4x6 unit requires minimum 30 total mounting points
- 4x8 unit requires minimum 35 total mounting points

2. The number of structural wall components (ie wall studs) available for mounting

> try to position the PegBoard such that the maximum number of wall studs are utilized

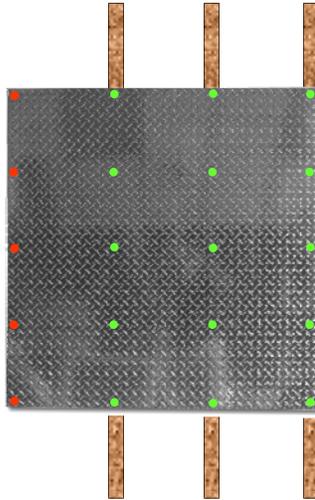

Example #1

PegBoard size: 2x4  
 3 wall studs utilized  
 12 total mounting points required  
 ● 9 screws  
 ● 3 hollow wall anchors

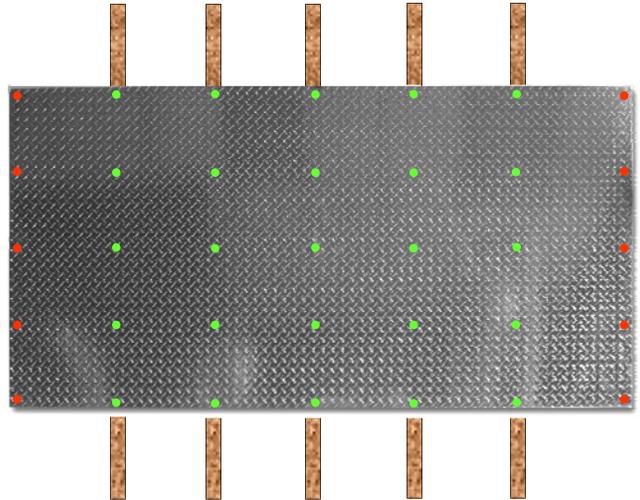

Example #2

PegBoard size: 4x4  
 3 wall studs utilized  
 20 total mounting points required  
 ● 15 screws  
 ● 5 hollow wall anchors

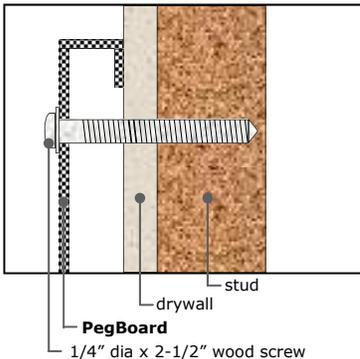

Example #3

PegBoard size: 4x8  
 5 wall studs utilized  
 35 total mounting points required  
 ● 25 screws  
 ● 10 hollow wall anchors

● Fastening into wall stud

● Fastening into hollow wall
