

# PEGBOARD X2™ FREESTANDING

## Free Standing PegBoard Display for Tradeshows and Retail

PegBoard X2™ FreeStanding Display is the next generation pegboard display. Built with heavy duty metal construction. Each unit is engineered to knock down and assemble in less than 5 minutes.

Available in an assortment of stunning colors and materials to meet any marketing aesthetic - tempered hardboard, stainless steel, diamond plate, anodized colors, brushed aluminum, colored aluminums and colored steels (which also works great as a magnetic surface). This versatile tool offers plenty of display and merchandising options to show products within plain view and easy reach of your target audience. Also can be used in factories and workshops to store tools within easy reach wherever a wall is not nearby.

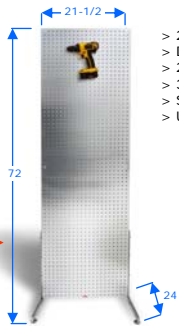

**diamondLife is the undisputed industry leader** with more metal pegboard panels manufactured and sold than all competitors combined. We pioneered the original metal pegboard panel and launched the whole industry. No other pegboard looks as good. No other metal pegboard panel is load rated. No other pegboard is built better – just look at the back side of any PegBoard X2™ – we are the only manufacturer that goes to the extra trouble of putting in back flanges for a completely rigid and finished product you can be proud of.

### Advantages

- **Dual Sided**  
versatile with thousands of peg hook holes
- **Easy Assembly**  
assembles and disassembles in minutes
- **Self-Leveling Feet**  
integral self-levelers for uneven floors, optional casters
